US shoots down 'threat'

Military fighter jets destroy unknown object off Alaskan coast

WASHINGTON — A U.S. military fighter jet shot down an unknown object flying off the western coast of Alaska on Friday on orders from President Joe Biden, White House officials said.

National Security Council spokesman John Kirby said the object was downed because it was flying at about 40,000 feet (12,500 meters) and posed a "reasonable threat" to the safety of civilian flights, not because of any knowledge that it was engaged in surveillance. Asked about the object's downing, Kirby on Friday said only that "it was a success."

Kirby described the object as roughly the size of a small car, much smaller than the massive suspected Chinese spy balloons downed by Air Force fighter jets Saturday off the coast of South Carolina after it spied over sensitive military sites across the continental U.S.

The twin downings in such close succession are extraordinary, and reflect heightened concerns over China's surveillance program and public pressure on Biden to take a tough stand against it. Still, there were few answers about the unknown object downed Friday and the White House drew distinctions between the two episodes. Officials credit Kirby's say if the latest object contained any surveillance equipment, where it came from or what purpose it had.

The Pentagon on Friday declined to provide a more precise description of the object, only saying that U.S. pilots who flew up to observe it determined it didn't appear to be manned. Officials said the object was far smaller or than the previous balloons, did not appear to be unmaneuverable and was traveling at a much lower altitude.

2023 Insert and Shipping/Receiving

SPECIFICATIONS AND DEADLINES

All inserts should be sent to the Honolulu Star-Advertiser Printing Facility in Kapolei (Oahu).

1. Insert pallets should be clearly labeled with the product name, total quantity, amount per skid or box, the total amount of skids and the insertion date.
2. If inserts are re-packaged, they should be re-packaged in the original form sent by the printer (same number of pallets, same amount on pallet, same number in a bundle, etc.)
3. Inserts should be packaged by insert date. If a product is running multiple dates, then it should be separated as such.
4. Inserts need to be at least .005" thick. Thinner sheets will often stick together causing "multiples."
5. Different inserts should NEVER be packaged on the same pallet. Verifying the count may be extremely difficult without removing all the bundles or boxes.
6. Insert bundles should not be tied (strapped) if possible. Strapping causes the product to curl and can make it difficult to feed into the insert machine.
7. No more than two turns (compensating stacks) per bundle would be optimum. Additional turns make it more difficult for the inserter to feed the machine.
8. Inserts should be stacked flat and not standing on edge.
9. Deadlines
 - a. Insertion orders due 21 business days prior to publication.
 - b. Inserts due 14 business days prior to publication.
10. Receiving
Hours are Monday-Friday from 8 am to 3 pm. (HST)
Closed Holidays.
